

TODARIDE

ADMIN & SUPER ADMIN ACCESS RESTRICTIONS

Recommended Role-Based Access Control (RBAC) Structure

Purpose: Establish a secure and scalable administrative structure for TodaRide as it expands into ride operations, income management, advertising, passenger rewards, investor management and social-enterprise activities.

Core principle: ADMIN runs TodaRide. SUPER ADMIN controls the entire system and business. Sensitive financial, corporate and security functions must be restricted and audited.

1. Recommended Administrative Roles

Role	Primary Responsibility	Access Level
SUPER ADMIN	Founder / highest system authority	Full system, business, financial and security control
ADMIN	Daily TodaRide operations	Operational management; limited financial access
FINANCE ADMIN	Financial management	Finance and reporting; no corporate/system authority
MARKETING ADMIN	Income & Promotion	Promotions, advertisers, campaigns and rewards
TODA ADMIN	Individual TODA organization	Only assigned TODA operations
AUDITOR	Independent review	Read-only access and audit logs

2. ADMIN — Operational Manager

The Admin is responsible for the day-to-day operation of TodaRide. Admin access should be broad enough to run the platform but restricted from ownership, investor, corporate-structure and high-risk financial controls.

Module	Admin Access
Dashboard	View
Passengers	Manage
Drivers	Manage
TODAs	Manage
Bookings	Manage / View
Trip Monitoring	Yes
Complaints	Manage
Safety Reports	Manage
Notifications	Manage
Basic Reports	View
Income & Promotion	Operational / limited
Rewards	Manage within configured limits
Referrals	View / Manage
Promotions	Manage
Advertisers	Manage campaigns
Financial Reports	Limited
Investor Information	No
Cap Table / Equity	No
Founder Equity / Contribution	No
Social Impact Fund Approval	No
Corporate Settings	No
User Roles / Permissions	No
System Configuration	No

3. SUPER ADMIN — Highest System Authority

Super Admin has all Admin permissions plus full access to sensitive business, financial, corporate, security and configuration functions. Super Admin should be limited to the Founder and specifically authorized senior personnel.

Module	Super Admin
Operations	Full
Passengers / Drivers / TODAs	Full
Bookings / Payments	Full
Safety	Full
Reports	Full
Income & Promotion	Full
Rewards / Referrals / Ride Credits	Full
Advertisers / Campaigns	Full
Financial Management	Full
Social Enterprise	Full
Investors	Full
Founder Contribution	Full
Developer Equity	Full
Cap Table	Full
Distributions	Full
Social Impact Fund	Full
Rotary / Social Impact Projects	Full
RCC / Community Programs	Full
User Roles / Permissions	Full
System Settings	Full
Security / Audit Logs	Full

4. Recommended Income & Promotion Access

Income & Promotion should remain a separate top-level tab inside the existing Admin/Super Admin area. The same page is displayed to both roles, but the available actions depend on permissions.

Income & Promotion Function	ADMIN	SUPER ADMIN
Overview	View	Full
Revenue	Limited View	Full
Promotions	Manage	Full
Advertisers	Manage	Full
Campaigns	Manage	Full
Rewards	Manage within limits	Full
Referrals	Manage	Full
Ride Credits	Limited	Full
Analytics	View	Full
Settings	No	Full
Commission Configuration	No	Full
Reward Rule Configuration	Limited / No	Full
Financial Adjustments	No	Full

5. FINANCE ADMIN

A dedicated Finance Admin is recommended once TodaRide begins handling meaningful revenue, advertising income, investor transactions and social-enterprise distributions.

Finance Admin can manage: revenue, expenses, P&L, cash flow, reward costs, advertising revenue, reconciliations and financial reports.

Finance Admin should NOT be able to: change ownership, alter Founder equity, modify system permissions, change core application configuration or unilaterally alter corporate structure.

6. MARKETING ADMIN

Marketing Admin manages the growth engine: promotions, advertising campaigns, advertisers, passenger rewards, referrals and social-media campaigns.

Marketing Admin should operate within budgets and reward rules approved by Super Admin. High-value campaigns or financial commitments can require approval.

7. TODA ADMIN

TODA Admin should only see the data and operations belonging to their assigned TODA organization.

TODA Admin Can	TODA Admin Cannot
View assigned drivers	View other TODAs' private data
Manage TODA driver records	Change platform commission
View TODA ride activity	Access investor information
View TODA performance	Change corporate ownership
Participate in approved promotions	Access Super Admin settings
View permitted reports	Access platform-wide financial data

8. AUDITOR — Read Only

Auditor access is designed for independent review. Auditors can view financial records, transactions, reports and audit logs but cannot modify operational, financial or corporate data.

9. Recommended TodaRide Hierarchy

SUPER ADMIN

Founder / highest authority

ADMIN — Operations

FINANCE ADMIN — Finance

MARKETING ADMIN — Income & Promotion

TODA ADMIN — Assigned TODA

AUDITOR — Read-only review

10. Separation of Duties

Do not make every administrator capable of doing everything. TodaRide should use role-based permissions so that operational, financial, marketing and corporate responsibilities are separated.

Role	Runs Operations	Manages Money	Manages Growth	Controls Corporate/System
Super Admin	Yes	Yes	Yes	Yes
Admin	Yes	Limited	Limited	No
Finance Admin	No	Yes	No	No
Marketing Admin	Limited	Limited	Yes	No
TODA Admin	TODA only	No	Limited	No
Auditor	Read only	Read only	Read only	No

11. High-Risk Actions Require Strong Controls

Even Super Admin actions should be recorded. For selected high-risk financial actions, use an approval workflow or dual-control process.

High-Risk Action	Recommended Control
Change platform commission	Audit + approval
Change reward conversion	Audit + approval
Large reward campaign	Budget + approval
Investor distribution	Approval / dual control
Equity or cap-table change	Restricted + audit
Social Impact Fund transfer	Approval + audit
Large financial adjustment	Approval + audit
Change administrator permissions	Audit + confirmation

12. Audit Trail

Every sensitive administrative action should record: user, date/time, action, affected record, old value, new value and reason.

Example: Platform Commission Changed — Old: 7.5% → New: 10% — User: Super Admin — Date/Time recorded — Reason: Approved pricing revision.

13. Final Access Philosophy

ADMIN = “Run TodaRide.”

Handles daily operations and approved marketing activities.

FINANCE ADMIN = “Manage the money.”

Handles financial records and reconciliation.

MARKETING ADMIN = “Grow TodaRide.”

Handles promotions, advertisers, campaigns and rewards.

TODA ADMIN = “Manage our TODA.”

Only manages its own organization.

AUDITOR = “Check what happened.”

Read-only independent review.

SUPER ADMIN = “Control the entire system and business.”

14. Implementation Requirement for Claude Code

Implement these roles using the EXISTING TodaRide authentication and role/permission architecture. Do not create a second login system. Do not rely only on hidden UI buttons—enforce permissions server-side/API-side as well. Every sensitive change must be audited.

This document is a proposed access-control architecture and should be refined with the project's actual legal, accounting and governance requirements before production deployment.
